

Minimum System Requirements

LC II, 16Mhz 68030 (Power PC is ideal)
5 MB of available RAM
2 MB of hard disk space for QuickTime™
2.5 MB hard disk space for The Rainforest application
CD-ROM drive
System 7.1 or later
Screen capable of displaying 640 x 480, 256 colors

Installation

The Digital Field Trip to The Rainforest requires QuickTime. We also recommend that you copy The Rainforest application from the CD to the hard drive. (You can run it directly from the CD, but it will run more slowly.)

If QuickTime 2.1.2 or later is not already installed:

1. Insert the disc into the CD-ROM drive.
2. Double click on The Rainforest CD-ROM icon to view the contents of the CD.
3. Double click on the **QuickTime Installer** folder.
4. Double click on the **Installer**.
5. Follow on-screen instructions to complete the QuickTime installation.

To install The Digital Field Trip to The Rainforest:

1. Drag **The Rainforest** icon from the CD to your hard drive.
2. Double click on the copied **The Rainforest** icon to run the program.

Troubleshooting

If your Mac has less than 8 MB of RAM, you might need to turn off unnecessary extensions and reduce the application size to 5000 K. If you get the message **Could not find QuickTimeLib** while launching the program, your computer might be low on memory; reducing the application size will help.

To reduce the application size:

1. Click on **The Rainforest** icon to select it.
2. Choose **Get Info** from the **File** menu.
3. Change the **Preferred Size** to 5000 K.
