

### Minimum System Requirements

LC II, 16Mhz 68030 (Power PC is ideal)  
5 MB of available RAM  
5 MB of hard disk space for QuickTime™  
2.5 MB hard disk space for The Wetlands application  
CD-ROM drive  
System 7.1 or later  
Screen capable of displaying 640 x 480, 256 colors

### Installation

The Digital Field Trip to The Wetlands requires QuickTime. We also recommend that you copy The Wetlands application from the CD to the hard drive. (You can run it directly from the CD, but it will run more slowly.)

#### If QuickTime 2.1.2 or later is not already installed:

1. Insert the disc into the CD-ROM drive.
2. Double click on The Wetlands CD-ROM icon to view the contents of the CD.
3. Double click on the **QuickTime Installer** folder.
4. Double click on **Installer**
5. Follow on-screen instructions to complete the QuickTime installation.

#### To install The Digital Field Trip to The Wetlands:

1. Drag **The Wetlands** icon from the CD to your hard drive.
2. Double click on the copied **The Wetlands** icon to run the program.

### Troubleshooting

If your Mac has less than 8 MB of RAM, you may need to turn off unnecessary extensions and reduce the application size to 5000 K. If you get message **Could not find QuickTimeLib** when you launch the program, you may be low on memory; reducing the application size will help.

#### To reduce the application size:

1. Click on **The Wetlands** icon to select it.
2. Choose **Get Info** from the **File** menu.
3. Change the **Preferred Size** to 5000 K.
